

Facilities report

Apologies for not being able to attend the last couple of meetings.

Work completed

- Skylights have been repaired.
- Work currently in progress on ceiling damaged by water.
- Fridge has been replaced but the old fridge is still in the kitchen
- Maintenance of lawn area and car park has been a task this year as the spring growth was exceptional. Dave Jordon has done an excellent job backed up by a few other members of the club and as a result the facility is looking well groomed.

Work to be completed

- Track cleaning and resealing. To be discussed this meeting
- Painting of lines – To be discussed
- Working bee not required as the work in maintaining the grounds is a constant commitment and there is not a requirement as there was last year to conduct large scale maintenance.
- Rubbish removal of some refuse that did not fit in the last industrial waste bin required. A skip bin is very expensive so it is suggested that a small amount of refuse be taken by members and disposed of through collective means.
- Weed spraying will improve the look of the grounds and reduce maintenance. New member Peter Dutneall who is a professional sprayer can assist. Suggest a quote from him to develop a weed control plan and have the work completed at the right intervals.
